

A100 Easy Plug in Connector Kit

These instructions apply to both the 122 and 147 type connector kits, see kit labeling for required model Leslie. **NEVER** connect any Leslie to this kit that is not in the designated family.

Installation is as follows:

1. Using the screws provided, mount the connector box on the rear side cabinet column such that the 5 pin cable can reach the Hammond™ Tone Cabinet connector on the rear of the main amplifier. (This is next to where the power cord attaches to the organ)
2. Connect a switch to the twisted brown wires, using the wire nuts provided. (Place the stripped ends parallel to each other DO NOT TWIST, and screw the wire nut onto the wires until firmly seated.)
3. Plug the 5 pin connector into the 5 pin Hammond™ Tone Cabinet connector.
4. Plug Leslie cable into the 6 Pin Leslie pigtail outlet.
5. Reconnect power, turn on the organ, and test for proper installation.
6. (NOTE: To silence internal speakers, remove the tubes from the main amplifier, this will not affect the signal sent to the Leslie cabinet, but it will disable the internal speakers AND REVERB)
