

# **IMPORTANT: THIS PRODUCT CONTAINS A 9 VOLT BATTERY!**

- **With normal use this battery should last for a long time, however in the event that it is drained you will need to remove the cover to replace it.**
- **The battery does not affect the units operation; it is solely used to power the indicator LEDs above each switch.**
- **In the event that the battery does fail, the unit can continue to be used with only the loss of the indicator lamps.**
- **To help extend battery life, the lamps will not light unless a speaker cable is plugged into the jack labeled “FROM AMP”.**
