

B+ POWER SUPPLY

- CAUTION -

Due to the presence of electrical charges and the danger of moving mechanical parts, installation procedures or adjustments requiring work inside the LESLIE™ speaker cabinet or the organ console should be performed ONLY BY a qualified service technician.

INSTALLATION

CAUTION: DISCONNECT ORGAN BEFORE PROCEEDING!

1. Using the screws provided, secure the power supply chassis in a location where the leads can reach the organ's preamp. It may be mounted in any aspect, so it can be installed on the side or even under the top of the console if desired.
2. Remove the AC Terminal Cover from the preamp and connect the B+ Power Supply wires to the preamp terminals as follows.
 - a. Blue - AC Mains Blue terminal
 - b. Gray - AC Mains Gray terminal
 - c. Yellow - Ground terminal
 - d. Brown - B+ Terminal
3. Reinstall the cover and check for proper operation. You may notice the on board LED shines brightly at first and then dims somewhat as the tubes warm and begin to draw current. This is normal.
